FINANCIAL INFORMATION SYSTEM

FIS Standard Curriculum OVERVIEW
Course Objectives

This course will help you:

• Understand the components and applications of the Financial Information System (FIS)

• Distinguish how FIS components interact with each other

• Familiarize yourself with FIS terminology

• Navigate within FIS

• Search and locate FIS data
Course Map

- The FIS Standard Curriculum

- Overview of the Financial Information System (FIS)
  - Financial Accounting (FI)
  - Funds Management (FM)
  - Controlling (CO)

- Basic Navigation
  - Screen Navigation and Tools

- Finding FIS Accounts
  - Finding Funds Centers and Funds
  - Finding Cost Centers and Internal Orders
  - Finding General Ledger Accounts

- Using the Match Code Search Tool
FIS Standard Curriculum

- **9 core courses** spanning approximately 6 weeks
- Provides foundation for accounting, budgeting and planning at the university
- Covers **best practices** and **business processes** involved in performing common financial transactions
- Builds on what is covered in the FIS Overview
- Provides ample opportunities to practice performing common FIS transactions using simulations that reflect real life scenarios

Financial Services

Financial Services is a department within the Chief Financial Officer portfolio, along with Procurement Services and Risk Management and Insurance.

The academic goals and objectives of the University are supported through excellent financial management, and the effective and appropriate use of all financial resources (operating, research, trust and capital funds).

The University’s decentralized management model places financial management responsibility within every division of the University as well as within Financial Services.

Website: https://finance.utoronto.ca/services/about-us/
Understanding FIS enables you to:

• provide decision makers with useful information

• **record** and **track financial transactions** to enable the production of various Management Reports and Financial Statements

• **prevent incorrect** or **incomplete information** which may result in:
  - additional time required to correct the original transaction
  - the possibility of incorrect decisions being made

Commitment Item (alphabetic code)
Financial Accounting (FI) is the core component of FIS and is designed to meet the *general* reporting requirements of U of T.

FI:
- Is used to record all *revenue*, *expense*, *accounts receivable* and *accounts payable* financial transactions
- uses **Business Area** code to generate more than one set of financial statements

**Commonly Used FI Account Codes:**
- General Ledger account (G/L)
- Business Area code (BA)

The purpose of Financial Accounting is to answer the question:

*What revenue or expense activity occurred?*
The General Ledger (G/L) account code is used to record all financial transactions in FIS.

Each G/L account is classified by the type of financial transaction.

Most Commonly Used G/L Accounts:
- Expense: 800000 – 899999
- Revenue: 700000 – 799999

Other G/L Account Types:
- Assets (e.g., cash, A/R): 100000 – 499999
- Liabilities (e.g., A/P, debt): 500000 – 599999
- Retained Earnings (e.g., annual surpluses): 600000 – 699999
A Business Area (BA) code enables the preparation of more than one set of financial statements and separates Ancillary Operations from all other university business activity.

- **For each FI transaction**, a BA code will be used to identify the business area it represents (i.e., Ancillary Operations or other).

**Business Area Codes:**

- Ancillary Operations: 1001 – 1999
- UofT activity excluding Ancillary Operations: 1000

- The BA code defaults based on the Cost Center or Internal Order used in the FIS transaction
Funds Management (FM)

Funds Management (FM) is used to track and report on funding and budgets for all university departments, divisions and faculties.

The purpose of Funds Management (FM) is to answer the questions:

What is the source of my funding?

AND

How much money do I have left?
FM Account Codes

FM Account Codes:

- **Funds Centers (FC)**
- **Funds Center / Fund combinations (FC/Fund)**
- **Commitment Items (CI)**

</tr>
</tbody>
</table>
Highest levels of the Funds Center hierarchy reflect main operational portfolios at U of T.

Individual Divisions and Departments are located within these portfolios.

Note: A Division/Department may have several Operating Funds Centers (1xxxxx) and PI Funds Centers (2xxxxx) under their hierarchy.

CFC 100546 is subordinate to CFC 101123 and parent to CFC 202675.
Commitment Items (CI)

A Commitment Item (CI) is the level at which a budget is established for a Funds Center or FC/Fund.

Enables you to:
- provide flexibility to set the level of budgetary control
- determine where FM will start looking for budget
- hold the budget for Funds Availability Checking
- to report summary revenue and expense postings to G/L accounts

Characteristics of CIs:
- alphabetic code
- assigned to all revenue and expense G/L accounts
- arranged in a hierarchy
- "1 to many" relationship with G/L accounts
Example Commitment Item Hierarchy

EXPENSE-S (level 1)  Total Expense
   COMPENS-S (level 2)  Total Compensation
      HRIS-APPT (level 3)  Appointed Salary
      HRIS-BEN (level 3)  Benefits
   SUPPL-S (level 2)  Total Supplies
      SUPPLIES (level 3)  General Supplies
      SERVICES (level 3)  General Services

"1 to many" Relationship with G/L Accounts
A list of numerous G/L accounts assigned to Commitment Item “SUPPLIES”
What is Funds Availability?

Funds Availability (FA) checking is a function in FM that prevents a transaction from being posted to a FC or FC/Fund combination IF there is insufficient budget to cover the transaction.

Characteristics of FA checking:

• ONLY checks expenditure transactions against funds available
• Occurs at the Commitment Item level where budget is loaded
Funds Availability Checking: How it Works

Within a transaction, FA checking begins by locating:

1. **FC** or **FC/Fund** combination

2. **Commitment Item (CI)**

3. Checks for budget at that **CI level** (e.g., Travel → Travel-S)

4. If budget is not found at lower summary level, **FA proceeds up the CI hierarchy** until budget is located (e.g., Expense-S)

5. Once budget is located, the following calculation determines if sufficient budget is available for transaction:

   \[
   \text{FUNDS AVAILABLE} = \text{BUDGET} - (\text{ACTUAL EXPENDITURES} + \text{COMMITMENTS})
   \]

**NOTE:** For all **Research Fund** accounts, FA checking occurs at the **CI where budget is loaded** (e.g., Travel-S). If budget is not found at that level, it **will not** allow the transaction to post.
The budget for **Operating** and **Ancillary** Fund Centers is loaded at the detailed Commitment Item level.

**Note:** You may see budgets at the lower level CI's in your FM reports.

These budgets **ONLY** appear for **reporting purposes** to enable you to compare actual spending to budgets (i.e., variance analysis), but it **does not reflect** where FIS performs **Funds Availability Checking** (i.e., overall EXPENSE-S).
For **Research Funds**, the CI where budget exists determines the restriction of spending. The lower the level in the CI hierarchy, the more restrictive the spending.

**Example:**
- **Total Funds Available**: $1,500.00
  - CI “SUPPL-S” has **no** funds available
  - “TRAVEL-S” has $1,500.00
- Any expenses posted to a G/L in the SUPPL-S CI will be **blocked**

</tr>
</tbody>
</table>

### OPERATING =

### RESTRICTED =

**NOTE:** Typically CI’s default from G/L accounts used in transactions, **but** there are some cases where CI’s must be **changed manually to access budget.**

The following CI’s require manual entry:
- **EXP – UTFA**
- **SPECIAL1**

These are shown under the **Commitment Item** column in **BOLD.**
Controlling (CO)

Controlling enables you to report on planned spending, and compare it to actual revenue and expense postings for a specific department, program or project at the general ledger level of detail.

It is similar to FM, but with an important difference – no spending control (i.e., Funds Availability Checking).

The purpose of Controlling is to answer the question:

Which department/project incurred the activity?
Controlling (CO)

There are two main account codes used in CO:

- **Cost Centers (CC)**
- **Internal Orders (IO)**

<table>
<thead>
<tr>
<th></th>
<th>Cost Center</th>
<th>Internal Order</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Brief description</strong></td>
<td>• five digit number starting with a 1 or 2 (departmental) or six digit number starting with a 2 (Principal Investigator)</td>
<td>• a six digit number&lt;br&gt;• May represent an organizational unit or program that initiated a financial transaction</td>
</tr>
<tr>
<td></td>
<td>• Represents the organizational unit or program that initiated a financial transaction</td>
<td></td>
</tr>
<tr>
<td><strong>Periodic Reporting</strong></td>
<td>• Fiscal year based (May 1 thru April 30)</td>
<td>• Non-Fiscal year based (any start or end date, annual or &quot;life to date&quot;)</td>
</tr>
<tr>
<td><strong>Hierarchy</strong></td>
<td>• grouped to reflect the organizational structure at U of T</td>
<td>• no hierarchy of its own, is linked to an organizational unit through its settlement to a Cost Center</td>
</tr>
<tr>
<td><strong>Planning</strong></td>
<td>• fiscal year basis</td>
<td>• fiscal year basis or overall</td>
</tr>
</tbody>
</table>

**Note:** Cost Centers are structured in a hierarchy of Nodes and Groups that are similar to the department’s Funds Center hierarchy (FM).
Reflecting the Organizational Structure: Cost Centers

To facilitate planning and reporting, Cost Centers are grouped using CC Nodes and CC Groups.

CC Node:

- reflect the organizational structure at U of T (similar to FM hierarchy)

CC Group:

- assigned to each CC Node, and allows an organizational unit to arrange its Cost Centers to meet departmental planning and reporting requirements

The Cost Center hierarchy is organized according to reporting and planning requirements of individual units.
Reflecting the Organizational Structure: Cost Centers (cont’d)

Example Cost Center Hierarchy (Academic)
Internal Orders (IO)

An Internal Order is a six digit numeric code that indicates the organization unit that initiated the transaction.

Internal Orders:

- Similar to Cost Center, but IO reporting period **does not follow** the University’s **fiscal year**
- have **no hierarchy** of their own, **but are linked** to a **responsible Cost Center**
- enable planning of expense and revenue activity
- **IO Groups** can be created to help departments optimize their **reporting** needs
Comparing Cost Center and Funds Center Hierarchies

Cost Centers and Funds Centers reflect the University’s organizational structure through their hierarchies.

An organizational units’ budget can be located in **one FC**, while actual expenses/revenues can be tracked using **multiple CCs**.

**Example:** Division of University Advancement (DUA), UofT Magazine FC & CCs.

**Difference:**
- budget is located in **one FC**
- actual/planned revenue & expenses are tracked using **six CCs**

**Funds Center Hierarchy**

**Cost Center Hierarchy**
Cost Elements (CE)

A Cost Element (CE) is a numeric code representing the G/L number within Controlling.

Characteristics of a Cost Element (CE):

• same account numbers as G/L numbers (six digit number)
• exists for revenue and expense items
• grouped into Cost Element Groups similar to the CI hierarchy
• enables planning at the Cost Element level so planned and actual expenses can be compared
Cost Elements (CE)

- Categorized into **revenue** and **expense** accounts
- Grouped similar to G/Ls in the **Commitment Item** hierarchy

**MENU PATH:** Accounting → Controlling → Cost Center Accounting → Master Data → Cost Element Group → Display. Enter "UofT-All" in the Cost element group field.
Sample FIS Transaction

Vendor Invoice Transaction
